CONTENTS

Gintaro Daikuhara, 1866–1934 1
Indicator Plants for Measuring Soil Populations of the Root-Knot Nematode, Heterodera Marioni (Cornu) Goodey. G. H. Godfrey 3
A New Method of Measuring the Aqueous Vapor Pressure of Soils. N. E. Edlefsen 29
Base Exchange Studies on the Pennsylvania Jordan Field Plots. F. G. Merkle 37
Phosphate Studies: I. Soil Penetration of Some Organic and Inorganic Phosphates. V. E. Spencer and Robert Stewart 65
First International Congress of Electro-Radio-Biology 81
Eilhard Alfred Mitscherlich. To the Sixtieth Birthday of the German Investigator. E. Von Boguslawski 83
Root Habits of Certain Crop Plants as Observed in the Humid Soils of New Jersey. Nolan F. Farris 87
Application of the Theory of Probability to the Size Distribution of Soil Aggregates. Clark Affleck 113
The Carbon-Nitrogen Ratio in Relation to Soil Classification. M. S. Anderson and Horace G. Byers 121
A Rapid Method for the Determination of Total Nitrogen in Soil. E. M. Emmert 139
Newer Aspects of Nitrification: I. G. Gopala Rao 143
Laws of Soil Colloidal Behavior: II. Ionic Exchange with Hydroxides. A. J. Pugh 161
Effect of Burning on Forest Soils. H. A. Fowells and R. E. Stephenson 175
Influence of Temperature on Bacterial Nitrification in Tropical Countries. S. P. Tandon and N. R. Dhar 183
Microbial Activities in Soil: I. Nitrogen Fixation by Azotobacter and Activity of Various Groups of Microbes in Palouse Silt Loam. S. C. Vandecaveye and B. R. Villanueva 191
Physiological Studies on Rhizobium: II. The Effect of Nitrogen Source on Oxygen Consumption by Rh. meliloti, Rh. trifolii, and Rh. phaseoli. R. H. Walker, D. A. Anderson, and P. E. Brown 207
Anion Exchange: I. Adsorption of the Phosphoric Acid Ions by Soils. S. Ravikovitch. 219
A Note on the Determination of Titanium in Soils. J. S. Joffe and L. T. Kardos 241
Soil Profile Studies: VI. Distribution of Titanium in Soils with Special Reference to Podzols. J. S. Joffe and A. J. Pugh 245
Studies on Soil Protozoa. F. S. Bodenheimer and K. Reich 259
Profile Studies of the Coastal Prairie Soils of Louisiana: I. Exchange and Solution Properties. E. A. Fieger and M. B. Sturgis 267
Anion Exchange: II. Liberation of the Phosphoric Acid Ions Adsorbed by Soils. S. Ravikovitch 279
Sorption of Liquids by Soil Colloids: I. Liquid Intake and Swelling by Soil Colloidal Materials. Hans Winterkorn and L. D. Baver 291
The Laws of Soil Colloidal Behavior: XIV. The Electrokinetics of Hydrous Oxides and their Ionic Exchange. Sante Mattson and A. J. Pugh 299
Laws of Soil Colloidal Behavior: III. Colloidal Phosphates. A. J. Pugh 315
A Comparison Between the Pipette Method and the Hydrometer Method for Making Mechanical Analyses of Soil. George John Bouyoucos 335
The Determination of Phosphate Availability in Calcareous Soils by Electrodialysis. W. T. McGeorge 347

The Arsenic Content of Soils. J. E. Greaves 355
Functional Relationships Between Soil Properties and Rainfall. Hans Jenny and Chester D. Leonard 363
Subdivision of the Upper Peninsula Experimental Forest on the Basis of Soils and Vegetation. S. A. Wilde and H. F. Scholz 383
The Microflora of Kazakstan Sands (Central Asia). E. E. Paulie 401
Studies on Tropical Soil Microbiology. II. The Bacterial Numbers in the Soil of the Malay Peninsula. A. Steven Corbet 407
Book Reviews 417
The Soil-Moisture System. G. B. Bodman and N. E. Edlefsen 425
The Cunninghamella Plaque Method of Measuring Available Phosphorus in Soil. A. Mehlich, E. B. Fred and E. Troug 445
Effect of the Degree of Base Saturation of a Soil on its Capacity to Fix Phosphorus in Difficultly Available Form. A. Floyd Heck 463
The Solubility of Phosphorus in Soils from Some Illinois Experiment Fields. H. J. Snider 471
A Method for Determining the Degree of Decomposition that Unknown Decayed Vegetable Organic Materials Have Already Undergone in Nature. George John Bouyoucos 477
Morphology and Genesis of the Solonetz Soils of Western North Dakota. Charles E. Kellogg 483

ILLUSTRATIONS

PLATES

GINTARO DAIKUHARA

Gintaro Daikuhara (1866–1934) ..... *frontispiece*

A COMPARISON BETWEEN THE PIPETTE METHOD AND THE HYDROMETER METHOD FOR MAKING MECHANICAL ANALYSES OF SOIL

Plate 1. The Dispersing Machine, Special Cup, Special Cylinder, and Soil Hydrometer.. 345

SUBDIVISION OF THE UPPER PENINSULA EXPERIMENTAL FOREST ON THE BASIS OF SOILS AND VEGETATION

Plate 1. Soils of the Upper Peninsula Experimental Forest..... 397
2. Ground Vegetation of the Upper Peninsula Experimental Forest..... 399

THE CUNNINGHAMELLA PLAQUE METHOD OF MEASURING AVAILABLE PHOSPHORUS IN SOIL

Plate 1. Growth of Cunninghamella on Soils with Different Amounts of Available Phosphorus..... 461

MORPHOLOGY AND GENESIS OF THE SOLONETZ SOILS OF WESTERN NORTH DAKOTA

Plate 1. Fig. 1. A typical view of the solonchak-complex..... 501
2. A typical view of the solodized solonetz-complex..... 501

TEXT-FIGURES

INDICATOR PLANTS FOR MEASURING SOIL POPULATIONS OF THE ROOT-KNOT NEMATODE, HETERODERA MARIONI (CORNU) GOODEY

Fig. 1. Indicator Crop Readings in Average Number of Galls per Plant on 20 Different Plots, with 10, 25, 50, 100, and 400 Plant Readings on Each Plot..... 16
2. Indicator Plant Readings on the Same Plots as in Figure 1, in Percentage of Plants Showing Infection, on the Same 25 to 400 Plants per Plot..... 18
3. Scatter Diagram, for Correlation Calculations, Showing the Curved-Line Correlation Between Gall-count Readings and Percentage-Infection Readings on 80 Separate Lots of 100 Plants Each, Where Gall Count Ranges Between 0 and 30 Per Plant..... 19

A NEW METHOD OF MEASURING THE AQUEOUS VAPOR PRESSURE OF SOILS

Fig. 1. Arrangement of Apparatus Used for Measuring Vapor Pressure of Soils..... 30
2. Electrical Connections Used in Measuring Resistance of Glass Wool Cell..... 31
3. Aqueous Vapor Pressure Curves, Permanent Wilting Percentages, and Field Capacities for a Fine Sandy Loam, a Clay Loam, and a Half-and-Half Mixture... 33
4. System for Demonstrating the Colligative Properties of Soil Moisture..... 33

BASE EXCHANGE STUDIES ON THE PENNSYLVANIA JORDAN FIELD PLOTS

Fig. 1. Typical Titration Curves..... 39
2. Relation Between pH and Saturation, Exchange H by Direct Titration..... 57
3. Relation Between pH and Degree of Saturation, Exchange H by Ammonium Acetate..... 57

PHOSPHATE STUDIES: I. SOIL PENETRATION OF SOME ORGANIC AND INORGANIC PHOSPHATES

Fig. 1. Diagram Illustrating the Meaning of the Proposed Term "Positionally Unavailable," and How it Differs from that of Fraps's Term "Physically Unavailable" 67

ROOT HABITS OF CERTAIN CROP PLANTS AS OBSERVED IN THE HUMID SOILS OF NEW JERSEY

Fig. 1. Rainfall and Mean Temperatures by 5-Day Periods During the Growing Season in 1930 and 1931 90
2. One-Half of the Root Systems of Mature Irish Cobbler Potato Plants Observed in the Fertilizer Ratio Test, 1930 95
3. One-half of the Root Systems of 70-Day-Old Irish Cobbler Potato Plants Grown from Various Sized Seed Pieces and Spaced at 9 inches in the Row, 1930 97
4. Root Systems of Mature Irish Cobbler Potato Plants Grown from Various Sized Seed Pieces and Spaced at 9 inches in the Row, 1930 97
5. One-Half of the Root Systems of Different Strains of Red Clover Seeded April 9, 1930 100
6. One-Half of the Root Systems of Various Strains of Red Clover Seeded August 25, 1930 101
7. One-Half of the Root Systems of Three Varieties of Corn, 1930 104
8. One-Fourth of the Mature Root Systems of Lancaster Sure Crop Corn Under Different Methods of Cultivation, 1931 105

APPLICATION OF THE THEORY OF PROBABILITY OF THE SIZE DISTRIBUTION OF SOIL AGGREGATES

Fig. 1. Graphs of Distribution Function with Three Different Values of r_m 116
2. Comparison Between Theoretical Synthetic Curve and Experimental Results 117
3. Theoretical Distribution Curves of Gold Sols Shown in Inset 118

NEWER ASPECTS OF NITRIFICATION: I

Fig. 1. Apparatus Designed to Show the Photochemical Oxidation of Ammonia in the Absence of Bacteria 145
2. Monthly Variations of the Total Radiant Energy of the Sun and the Nitric Nitrogen of the Atmosphere 156

LAWS OF SOIL COLLOIDAL BEHAVIOR: II. IONIC EXCHANGE WITH HYDROXIDES

Fig. 1. Original Concentration of Oxalate 2.05 m.e. in 200 cc 164
2. Original Concentration of Oxalate 2.05 m.e. in 200 cc 164
3. Original Concentration of Oxalate 2.05 m.e. in 200 cc 165
4. Original Concentration of Oxalate 2.05 m.e. in 200 cc 165
5. Original Concentration of Oxalate 2.05 m.e. in 200 cc 166
6. Original Concentration of SO_4 4 m.e. in 200 cc 168
7. Original Concentration of SO_4 4.0 m.e. in 200 cc 168
8. Original Concentration of SO_4 Plus C_2O_4 10.0 m.e. in 500 cc 170
9. Original Concentration of SO_4 Plus C_2O_4 10.0 m.e. in 500 cc 170

MICROBIAL ACTIVITIES IN SOIL: I. NITROGEN FIXATION BY AZOTOBACTER AND ACTIVITY OF VARIOUS GROUPS OF MICROBES IN PALOUSE SILT LOAM

Fig. 1. Microbial Development and CO_2 Production in Manured Palouse Silt Loam 196
2. Microbial Development and CO_2 Production in Virgin Palouse Silt Loam 197
3. Microbial Development and CO_2 Production in Manured and Unmanured Palouse Silt Loam at Different pH Values 203

PHYSIOLOGICAL STUDIES ON RHIZOBIUM: II. THE EFFECT OF NITROGEN SOURCE ON OXYGEN CONSUMPTION BY RH. MELILOTI, RH. TRIFOLII, AND RH. PHASEOLI

Fig. 1. The Ratios of the Amounts of Oxygen Consumed by *Rhizobium trifolii* in the Various Nitrogenous Media to That Consumed in the Medium Without Nitrogen 212
2. Oxygen Consumption by *Rhizobium meliloti* in Media Containing Yeast Extract .. 212
3. Oxygen Consumption by *Rhizobium meliloti* in Media Containing Ammonium Chloride, Sodium Chloride, Urea, and Alanine 213
4. The Ratios of the Amounts of Oxygen Consumed by *Rhizobium meliloti* in the Various Nitrogenous Media to that Consumed in the Medium Without Nitrogen. 214
5. Oxygen Consumption by *Rhizobium phaseoli* in Media Containing Yeast Extract. 215
6. Oxygen Consumption by *Rhizobium phaseoli* in Media Containing Ammonium Chloride, Sodium Nitrate, Urea, and Alanine 216
7. The Ratios of the Amounts of Oxygen Consumed by *Rhizobium phaseoli* in the Various Nitrogenous Media to that Consumed in the Medium Without Nitrogen 216

ANION EXCHANGE: I. ADSORPTION OF THE PHOSPHORIC ACID IONS BY SOILS

Fig. 1. Adsorption of Phosphoric Acid Ions by a H-Soil and a Ca-Soil (from Esdraelon Valley) from Solutions of Various Concentrations 228

STUDIES ON SOIL PROTOZOA

Fig. 1. Number of Soil Protozoa 263

ANION EXCHANGE: II. LIBERATION OF THE PHOSPHORIC ACID IONS ADSORBED BY SOILS

Fig. 1. Effect of the Addition of $Ca(OH)_2$ on the Liberation of PO_4 in a H-Sandy Soil 281
2. Effect of the Addition of $Ca(OH)_2$ on the Liberation of PO_4 in a H-Clay Soil 284
Fig. 3. Effect of the Addition of NaOH on the Liberation of PO_4 in a H-Sandy Soil 287
4. Effect of the Addition of NaOH on the Liberation of PO_4 in a H-Clay Soil 287

SORPTION OF LIQUIDS BY SOIL COLLOIDS: I. LIQUID INTAKE AND SWELLING BY SOIL COLLOIDAL MATERIALS

Fig. 1. Apparatus for Measuring the Liquid Sorption and Swelling of Soil Colloids 292

THE LAWS OF SOIL COLLOIDAL BEHAVIOR: XIV. THE ELECTROKINETICS OF HYDROUS OXIDES AND THEIR IONIC EXCHANGE

Fig. 38. The Adsorption of the Oxalate Ion by Aluminum, Ferric, Titanium, and Stannic Hydroxides 309

THE DETERMINATION OF PHOSPHATE AVAILABILITY IN CALCAREOUS SOILS BY ELECTRODIALYSIS

Fig. 1. Typical Examples of the Effect of Amperage on Phosphate Extracted by Electrodialysis from a Poor Soil and a Good Soil 349
2. Relation Between Neubauer Value, Milligrams PO_4 Removed from 100 Gm. Soil by 100 Rye Plants, and Milligrams PO_4 Extracted from 2 Gm. Soil by Electrodialysis with 0.2 Ampere Flow of Current 350

FUNCTIONAL RELATIONSHIPS BETWEEN SOIL PROPERTIES AND RAINFALL

Fig. 1. Chestnut Soils, Chernozems, and Prairie Soils Form Narrow Belts Extending from North to South 366
2. Depth of Carbonate Zone 367
3. Nitrogen-Rainfall Function I 368

4. Nitrogen-Rainfall Function II 370
5. Amount of Inorganic Colloid as Affected by Rainfall 371
6. Clay-Rainfall Correlation 372
7. Soil Acidity Relationships. Change in pH and Exchangeable H Ions with Rainfall 373
8. Saturation Capacities of the 0–10 Inch Surface Samples 374
9. Relation Between Exchangeable Cations and Rainfall 375
10. Generalized Sigmoid Curve Showing an Inflection Point in the Semi-Arid Region and a Maximum Under High Rainfall 377
11. Relative Soil Property-Rainfall Curves Demonstrating That Various Soil Characteristics Exhibit Different Rates of Formation 378

SUBDIVISION OF THE UPPER PENINSULA EXPERIMENTAL FOREST ON THE BASIS OF SOILS AND VEGETATION

Fig. 1. Schematic Representation of Typical Soil Profiles, Showing the Minimum and Maximum Depths of the Horizons 385
2. Soils and Forest Cover of Virgin Portion of the Experimental Forest 386

STUDIES ON TROPICAL SOIL MICROBIOLOGY: II. THE BACTERIAL NUMBERS IN THE SOIL OF THE MALAY PENINSULA

Fig. 1. Fluctuations in Bacterial Numbers on Block 15 of the Sungei Buloh Experiment Station During the Conversion of Virgin Forest into a Rubber Plantation 409

THE SOIL-MOISTURE SYSTEM

Fig. 1. Typical Vapor-Pressure Curves for Sand and Clay, Showing Wilting Percentages and Field Capacity 427
2. Diagram of Forces Acting on Elemental Volume of Water 429
3. Diagram of Water Wedge to Illustrate Forces Acting on Soil Moisture 430
4. A System for Demonstrating the Colligative Properties of Soil Moisture 433
5. Relationship Between Vapor Pressure and Capillary Potential of Water at 20°C. .. 435
6. Relationship Between Time Since Disappearance of Water Table from Soil Surface and Moisture Content of Soil, Expressed as Surface Inches 437
7. Transmission of Water Through Saturated Sands and Soils 439
8. Quantity of Water Transmitted Through Soil Planes in Surface Inches Per Day as Related to Depth and Time 440

THE CUNNINGHAMELLA PLAQUE METHOD OF MEASURING AVAILABLE PHOSPHORUS IN SOIL

Fig. 1. Relation of Lateral Growth of Cunninghamella on 10 Different Soils Before and After the Addition of 10 Increments of Available Phosphorus 450

EFFECT OF THE DEGREE OF BASE SATURATION OF A SOIL ON ITS CAPACITY TO FIX PHOSPHORUS IN DIFFICULTLY AVAILABLE FORM

Fig. 1. The Relation of Hydrogen-Ion Concentration to Phosphorus Fixation in Miami Silt Loam 465
2. The Relation of Exchangeable Calcium to Phosphorus Fixation 465
3. Relation of Exchangeable Base (Calcium) to the pH Values of Miami Silt Loam and Waipio Soil 466
4. Exchangeable Calcium Retained by Miami Silt Loam and Waipio Soil When the Calcium Saturated Soils are Leached with Carbonated Water 467
5. The Effect of Exchangeable Calcium and Exchange Material on the Recovery in Readily Available Form of Phosphorus Applied to Waipio Soil 469

THE SOLUBILITY OF PHOSPHORUS IN SOILS FROM SOME ILLINOIS EXPERIMENT FIELDS

Fig. 1. Solubility Curves Showing the Effect of Time Upon the Amount of Phosphorus Extracted from Different Soils 474

MORPHOLOGY AND GENESIS OF THE SOLONETZ SOILS OF WESTERN NORTH DAKOTA

Fig. 1. Sketch Map Showing the General Features of Vegetation and Climate for Western North Dakota 485
2. Sketches Showing Some of the Principal Types of Profiles Mentioned in the Text. 486
3. Cross Section, Made to Scale from Level Notes, Through the Puffed Spot in the Solonchak-Complex 489
4. Cross Section, Made to Scale from Level Notes, Through an Eroded Spot on the Solonetz-Complex 493
5. An Outline of the Cycle of Evolution of the Alkali Soils in Western North Dakota. 497
